

AquaBella®

- for more use
- Introduce with one hand only
- without stick

Shower sleeves

GALERIE

AquaBella® is the most secure prevention against water or other liquid for a patient having dressings or cast, either on hand, arm, leg, foot or head. (Fracture, ulcer, burns, surgery wound...) The dressing or the cast, under plastic film, stay absolutely dry while showering or washing. Because the elastic is sealed, **AquaBella®** can be put on, over the cast or dressing, with only one hand and without any extra help. The fixing, with no ribbon adhesive on the skin, avoids allergies to Latex.

AquaBella® can be used several times. With **AquaBella®**, now, you can shower every day as usual. The efficiency of **AquaBella®** is so that it will prevent you from accidental infection and therefore accelerate the healing. **AquaBella®** is the ideal accessory to be used in hospitals, clinics and at home.
